# Adebayo Ajayi

Software Developer

## Education

- Fullstack Utvecklare** Aug 2020 - Jul 2022  
[Chas Academy, Stockholm](#)  
Fullstack Development with emphasis on javascript/typescript frameworks such as Nodejs, React , Angular And Laravel php frameworks.I studied agile development , version control with git and clean code, software architecture and other methodologies.

- INFORMATION- OCH MEDIETEKNIK** Sep 2015 - Aug 2016  
[Grillska Gymnasiet, Liljeholmen](#)

## Employment

- Examensarbete** Apr 2022 - Present  
[Swedcon 18, Stockholm](#)  
For my master thesis in conjunction with another colleague i am building a Fullstack application using Java spring boot for the backend and nextjs for frontend.  
We follow the agile principles and are always looking for creative solutions to issues that come up.

- LIA** Oct 2021 - Apr 2022  
[Swedcon 18, Remote](#)  
During my LIA i got the opportunity to grow and learn a lot i was quickly able to acclimate myself and understand the application and because of my full stack background and previous knowledge of java i became a lead for the frontend team. I was charge of planning out sprints , streamlining the development process with tools and practise for a better DX and onboarding process.

- It Support** Apr 2019 - Apr 2022  
[Get Geek AB, Stockholm](#)  
Worked as a home visit technical support agent. I worked with mundane issues such as fixing routers, backing up photos etc but what i learned the most during this period was being able to explain and talk about technology to less technical people since most of my clients where older people with little to no understanding of modern technology.

- Catering staff** Aug 2016 - Dec 2019  
[Westers Ab](#)
